Add tank button

New User

Returning User

Note:

- Fish will be one of the user's fish (one of the fish pixel art) --> randomly cycles between fishes everytime user logs in

Note:

- Logo TBD

Note:

- Goldfish pixel art (= notifications)
- Notifications could be:
 - Feed your ... fish (appears based on feeding schedule and most recent feeding)
 - Fertilize ... plant (same logic)
 - Change tank ... water (same logic)

Add organism button

Note:

- Pixel art of organism on the circle.
- If fish is hungry, when user hovers over fish circle, fish will look at user and open/close mouth pleading for food.
- If fish is dirty, fish will appear with some gunk on their face/body when user hovers over their circle.

Note:

- Add organism. --> whenever user adds new organism, the inputted "common_name" of the fish will be used to identify corresponding information for the fish using a "fish database" and scrape it to get other info like species, scientific name, salinity type, region/country of origin, etc. --> If missing certain fields, user will input manually

About

Note:

- view information about organisms of a certain species (e.g., species 1).
- able to view each organism's custom name, scientific name, common name, size, salinity type, health status, growth stage, current size, date added.
- current size of fish will be reflected visually. Other info will be listed.

Open separeate page when selected one of the tanks

If user selects one of the circles
